... not just data and information ...

Louis Ritman: Flower Garden

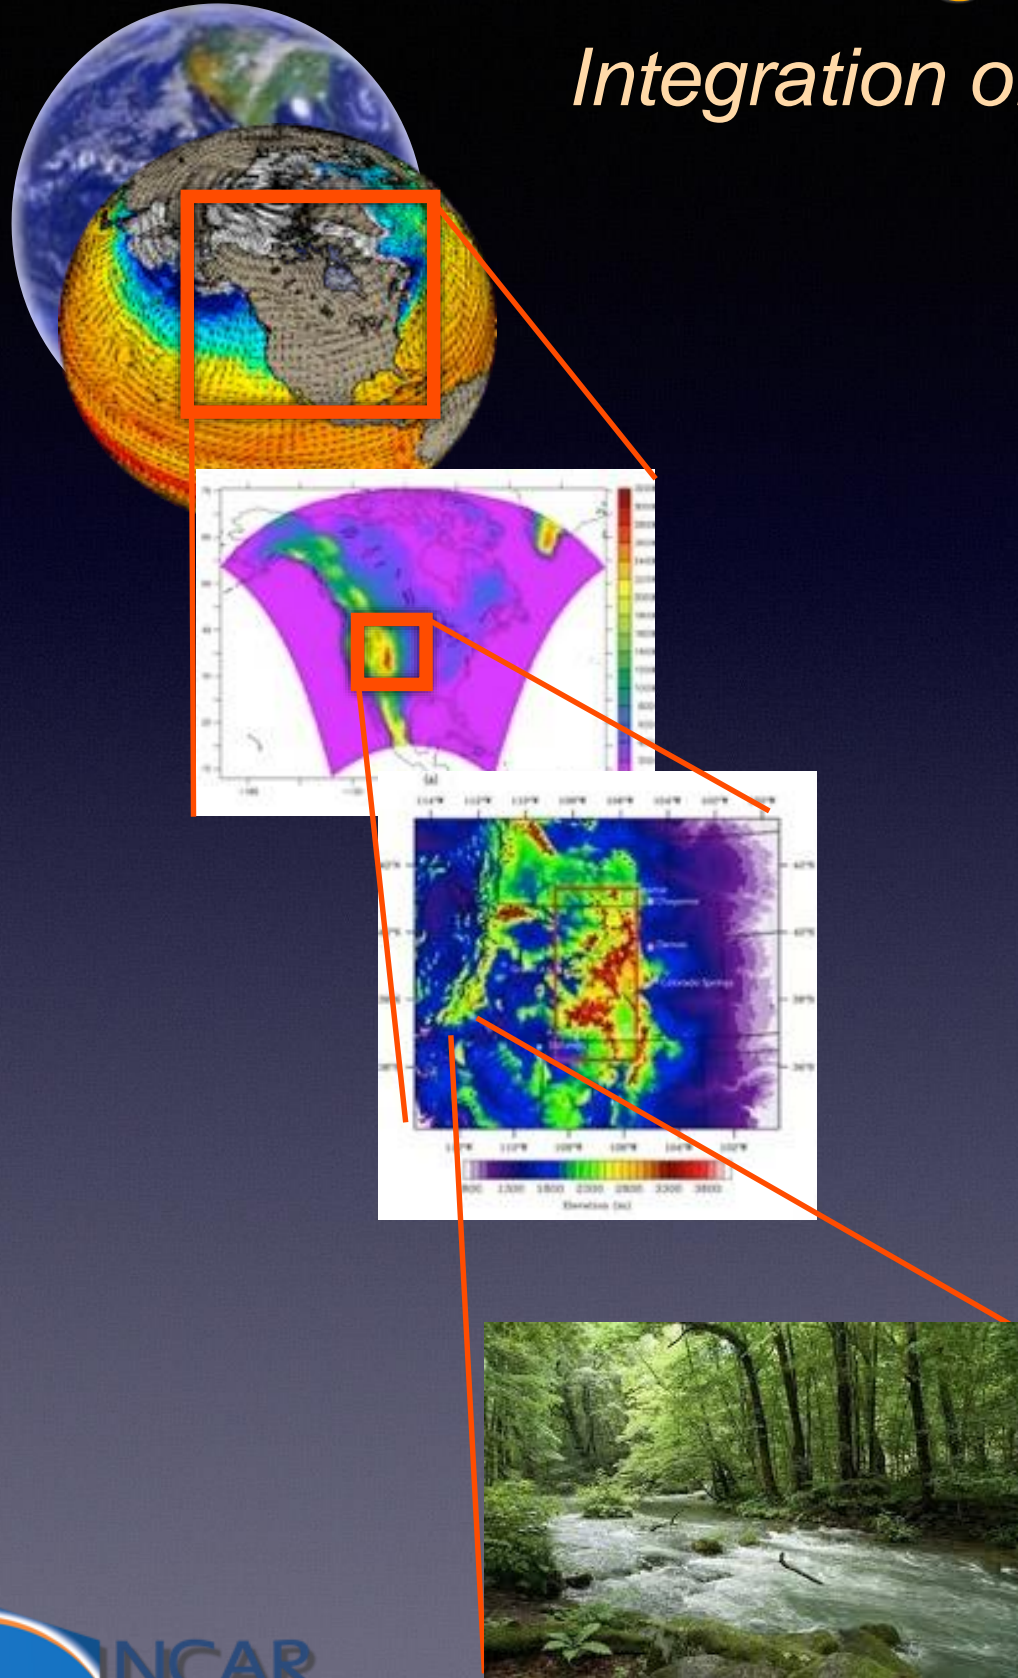

a picture is more than pixels

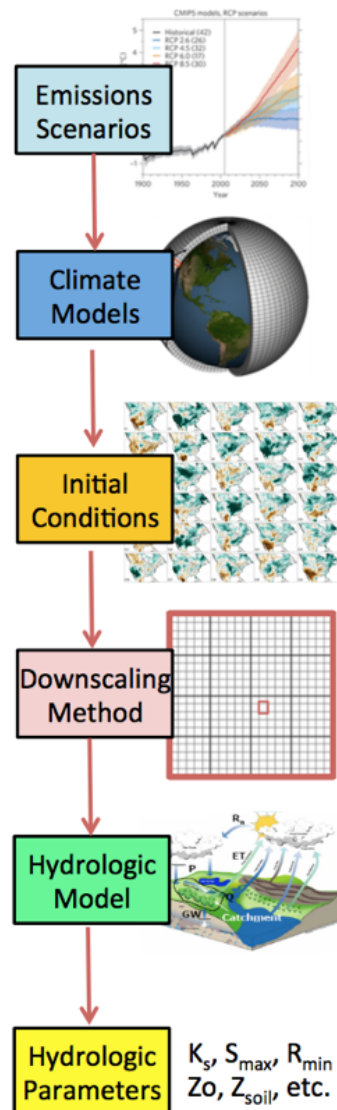

Focus on Regional Climate and Impacts

Integration of data and knowledge across scales.

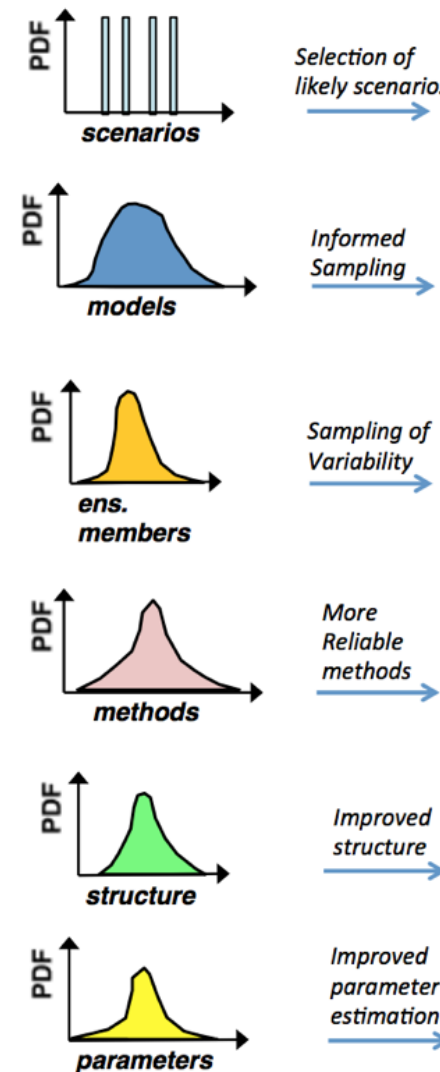

Global - to - Local

Climate Impacts Modeling Chain

Characterizing Uncertainties

Reducing Uncertainties

Hydrologic Storylines

Clark et al.
2016

air • planet • people

Water: Precipitation \neq Precipitation

*Application-specific understanding and
evaluation needed*

Itaipu : Hydropower

Mexico : Drought

Panama : Flash Flood

Haiti : Hurricane

Climate Impact Studies : Current Climate Data Libraries

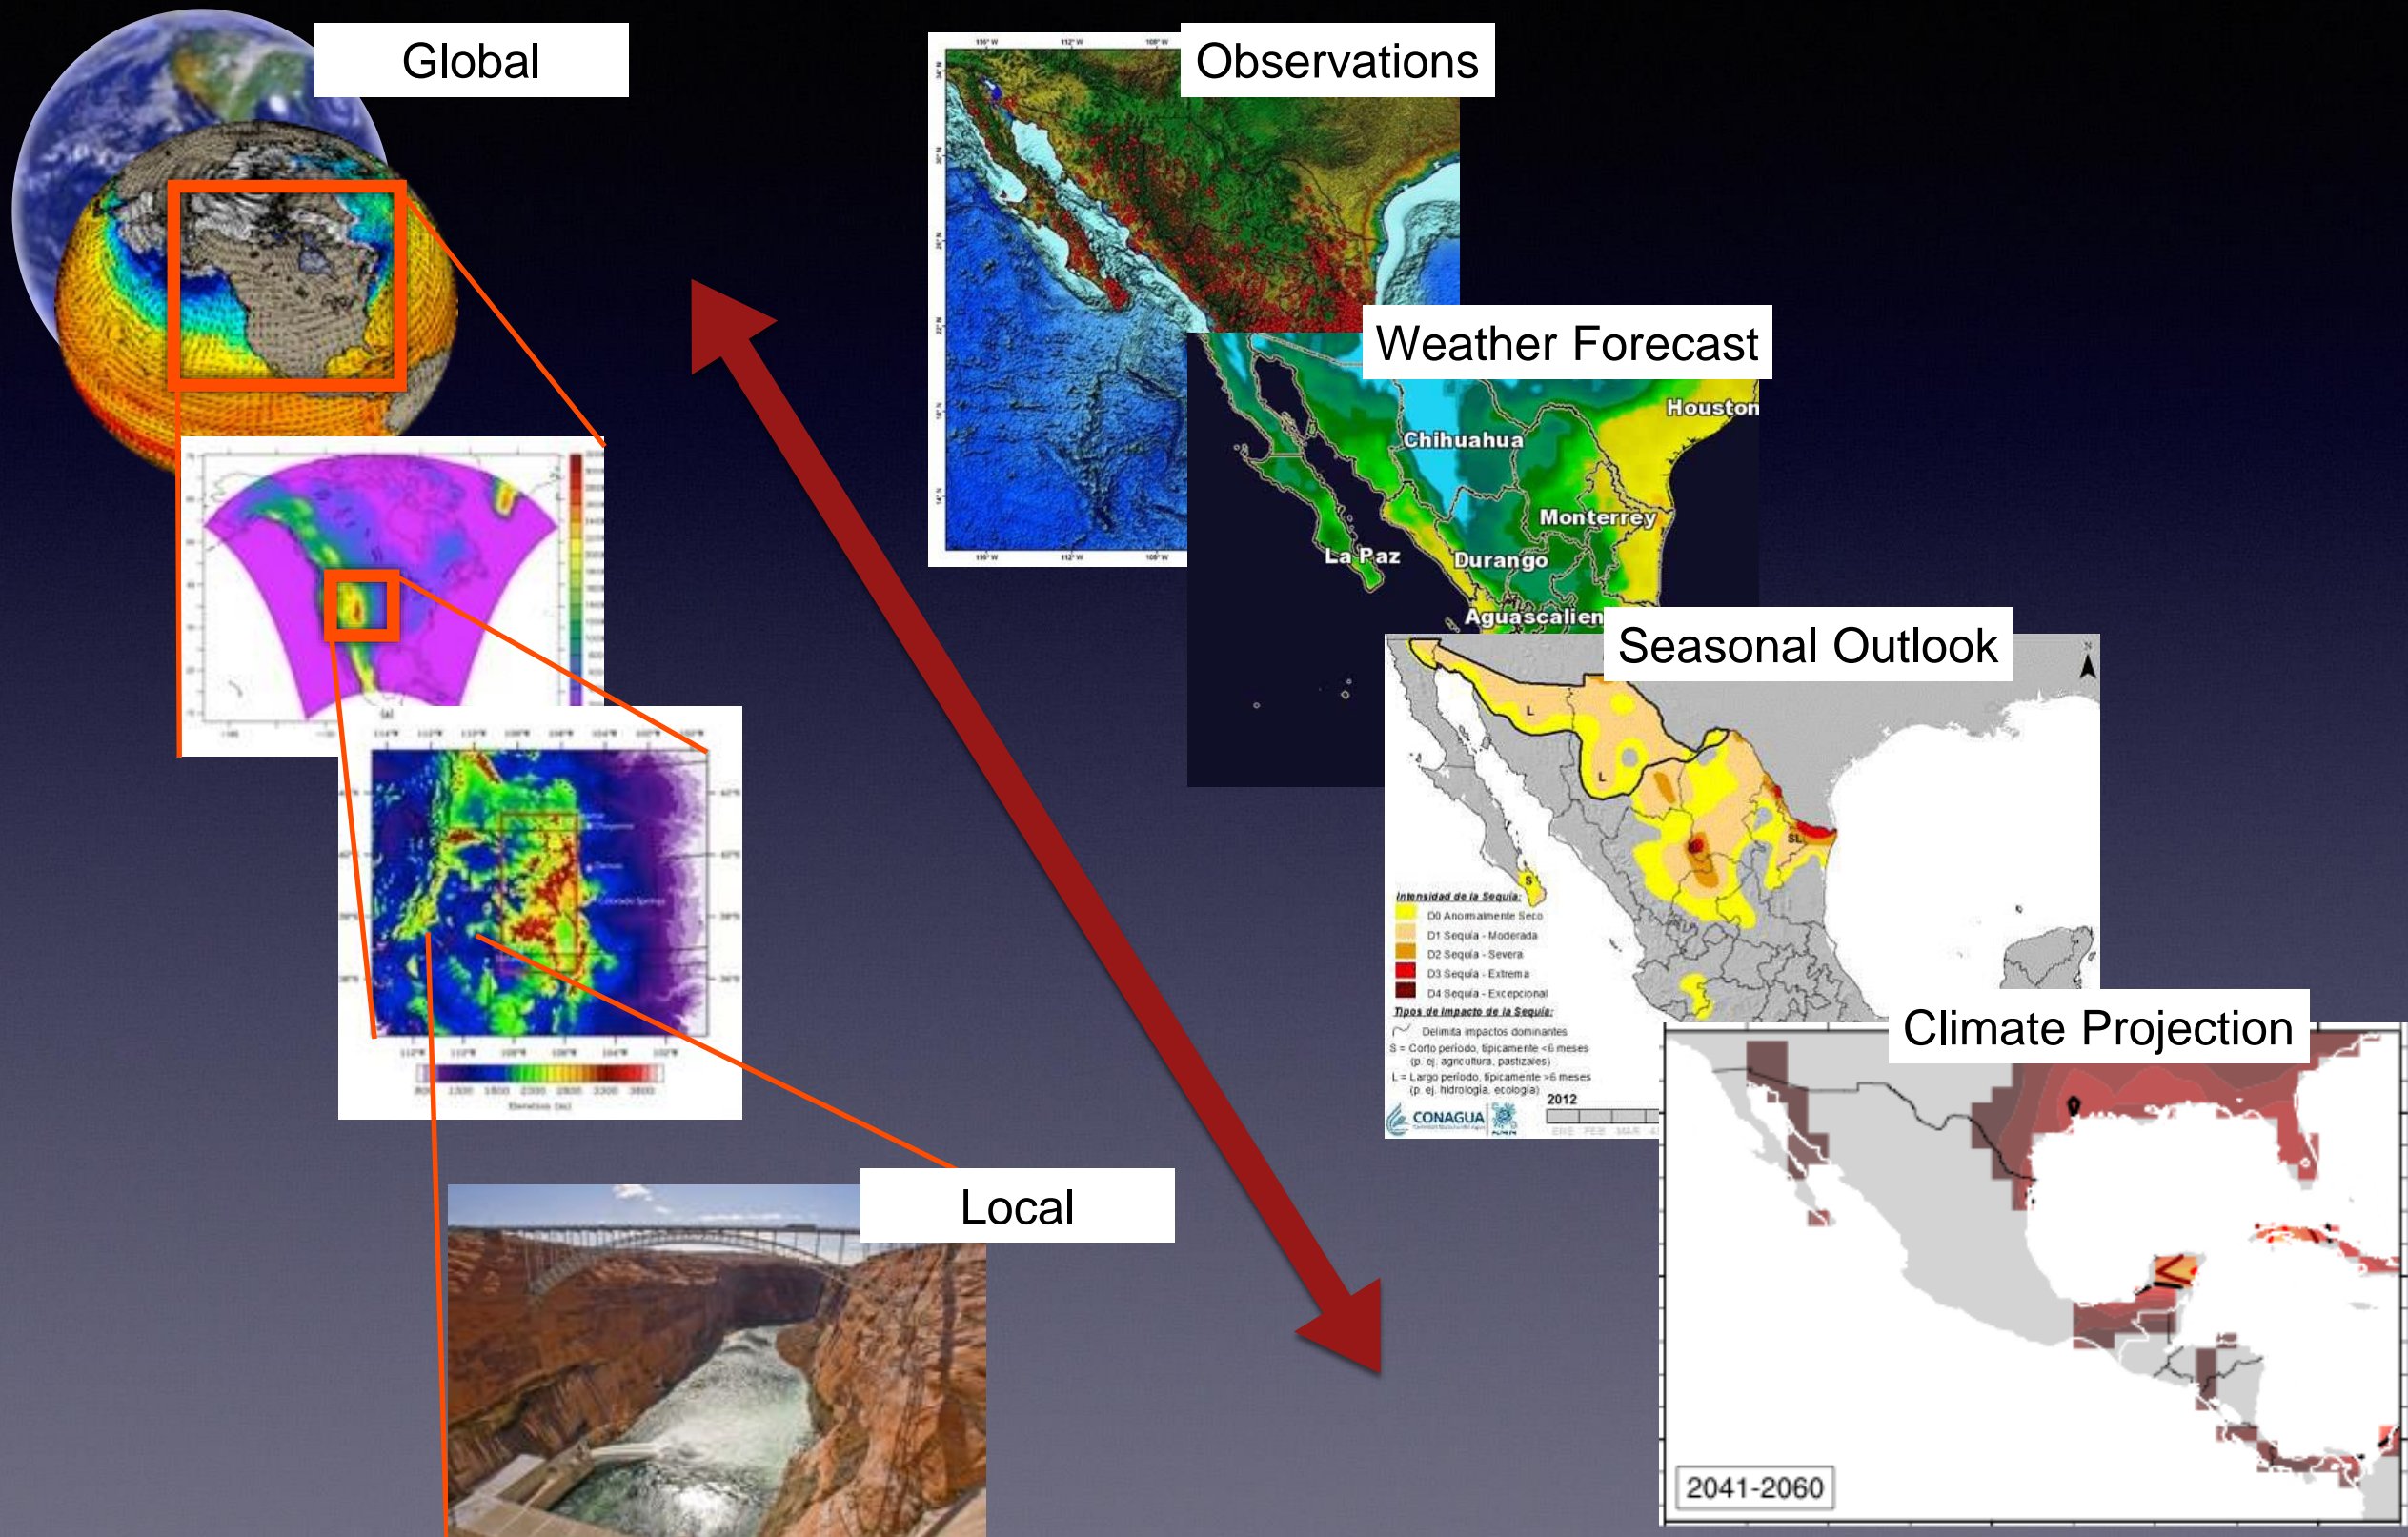

IPCC AR4 (2007)
IPCC AR5 (2013)
IPCC AR6 (~2021)

total: 35 TB (Terabyte)
total: 2,200 TB
(Petabyte)
expected: 0.2-1 EB
(Exabyte)
~ 1,000,000 TB

Cascade of Challenges

Integrating Spatial Scales

Temporal Needs

Primary exposure categories by sector

Many similarities, but different thresholds, and some unique

Ports Hazards

High wind
Wave heights
Harbor water levels
River water levels: Flood / Drought
Storm surge
Extreme Temperatures: Heat/Cold
Cooling degree days
Tropical cyclone risk

Forestry Hazards

Fire
Drought
Geographic / Optimal Range
River flooding, Flash flood
Wind
Snowfall
Water scarcity
Extreme Temperatures: Heat/Cold
Tropical cyclone risk

Insurance Hazards

Storms & Tropical cyclones
River flooding, Flash flood
Wintry precipitation
Storm surge
Extreme Temperatures: Heat/Cold
Drought
Fire
Country-level integration

Ports

Forestry

Insurance

Climate Change Impacts on Water and Agriculture: Developing Country-level Strategies

ADDING VALUE FOR SCREENING AND APPLICATIONS

Climate Change
Knowledge Needs:

Climate Screening

Current Data Gap
*difficult access, no sectoral
tailoring, lack of evaluation options*

**Application, Impact Analysis
& Capacity Building**

Enhanced Data Tools

Analysis, Tailored Evaluation,
Bias-Correction,
Sector Syntheses

NCAR-CRMe:

Climate Data Archives

Observations: gridded and station
Models: global, regional, downscaled

Analytics and Evaluation

Indicators: sectoral tailoring
Comparisons: QA/QC diagnostics
Analyses: variability, change, uncertainty
Others: Downscaling strategies, bias-
correction options, Weather-Generators

Visualization and Access

Maps: Zoomable products
Dashboards: Sector-specific summaries
Download: gridded and time series
